

ANIMAL WELFARE SYMPOSIUM INVITATION

Date: Friday, 11th May 2018

TRANSLATIONAL RESEARCH INSTITUTE Auditorium, 37 Kent Street, Woolloongabba, QLD 4102

ANZLAA, TRI, UQBR and Tecniplast Australia are delighted to announce the program for the 2018 Animal Welfare Symposium, a contemporary animal welfare event presented by international and local speakers;

Associate Professor Betty Theriault - DVM, DACLAM, President of the International Association of Gnotobiotics. Director, Gnotobiotic Research Facility, The University Of Chicago, USA Facing Gnotobiotics Challenges & Segmented Filamentous Bacteria

Associate Professor Ingrid Winkler - Senior Research Fellow and head of the Stem Cells and Cancer group. Mater Research, Brisbane

Impact of Microbiome. Models affected by 'clean facilities'

Professor Craig Franklin - Deputy Head of School, Executive Director of Research Ethics, Professor in Zoology. University of Queensland in partnership with Australia Zoo, Brisbane Use of Telemetry in addressing one of the 3R's - Refinement

Dr Rebekah Scotney - Clinical Academic, School of Veterinary Science. University of Queensland & Felicity Couperthwaite, Health and Wellbeing Manager, Queensland University of Technology

Compassion Fatigue – Where are we now?

Dr Judy Cawdell-Smith – Senior Lecturer in Equine Science & Affiliated Senior Fellow. University of Queensland, Brisbane

Equine Abortion Models in Guinea Pigs and the Amniotic Microbiome

Associate Professor Sheila Donnelly – Senior Lecture, Facility of Science. University of Technology, Sydney

Training and Accreditation. Why is it important & where do you start?

Dr Brian Tse - Senior Preclinical Imaging Scientist, Preclinical Imaging Core Facility. Translational Research Institute, Brisbane

Welfare Issues associated with Radiation Therapy

Refreshments on arrival and morning tea and lunch provided To secure your place at this exciting event please RSVP to: events@tecniplast.com.au before Friday 4th May 2018

PROGRAM PREVIEW

8:15-9:00	Registration and Refreshments	
9:00-9:15	Opening and Welcome	Professor Ian Frazer AC FRS
		Faculty of Medicine
		The University of Queensland
9:15-10:15	Facing Gnotobiotic Challenges	Associate Professor Betty Theriault
	Presented by the Microbiome Frontier	DVM, DACLAM, President of the International
		Association of Gnotobiology.
		Director, Gnotobiotic Research Animal
		Facility, The University Of Chicago, USA
10:15-10:45	Impact of the Microbiome, models	Dr Ingrid Winkler
	affected by 'clean facilities'	Associate Professor
	Case study	Stem Cells and Cancer
		Mater Research – University of Queensland
10:45-11:15	Morning tea	
11:15-11:45	Welfare issues associated with	Dr Brian Tse
	radiopharmaceutical therapy	Senior Preclinical Imaging Scientist
	,	Translational Research Institute
11:45-12:15	Field-based studies and the benefits	Professor Craig Franklin
	of taking the lab to the animal: The	Deputy Head, School of Biological Sciences
	role of telemetry in achieving	University of Queensland
	"refinement" within the 3R framework	
12:15-12:45	Segmented Filamentous Bacteria: A	Associate Professor Betty Theriault
	commensal bacterium contributing	DVM, DACLAM, President of the International
	new insights into the complex world	Association of Gnotobiology.
	of microbes, host immune regulation	Director, Gnotobiotic Research Animal
	and animal model fidelity	Facility, The University Of Chicago, USA
12:45-13:45	,	Lunch
13:45-14:45	Compassion Fatigue – where are we	Dr Rebekah Scotney
	now?	Clinical Academic
	Case study	School of Veterinary Science
	,	Faculty of Science. University of Queensland
		Felicity Couperthwaite
		Health and Wellbeing Manager
		Queensland University of Technology
14:45-15:15	'The guinea pig – a model for Equine	Dr Judy Cawdell-Smith
	Amnionitis and Foetal Loss'	BVSc(Hons), PhD, DipVetClinStud. Senior
		lecturer in Equine Science. School of
		Agriculture and Food Sciences.
		University of Queensland
15:15-15:45	Training and accreditation why it is	Associate Professor Sheila Donnelly
	important? And where do you start	University of Technology, Sydney
	Case study	
15:45-16:15	Tech Talk - Evaluation of the release	Rebekah Crasto
	kinetics of fentanyl patches in rabbits	Faculty of Medicine, University of NSW
	using behavioural and blood	2017 Tecniplast Australia Scholarship
	concentration measurements	Research Award recipient
4:15pm	Final Comments and Close	
0	Tituli Cottiitietiis and Close
