CONFERENCE TOURS

We have an exciting line-up of tours of three facilities in Palmerston North. Transport to and from the conference venue will be provided.

AGRESEARCH GRASSLANDS

A tour highlighting four of AgResearch's facilities for animal research:

- ▶ The Automated Nutritional Dispensing System (ANDS) - a novel system for caging and automatic feeding of neonate piglets for use in experimental research
- ▶ The New Zealand Animal Ruminant Methane Measurement Centre - dedicated methane measurement facility, comprising 24 chambers for sheep and four for cattle. This tour will explain how the methane chambers work and the impact of research in this area
- ▶ Fistulated cows - integral to research into anaerobic rumen microorganisms, methane mitigation, and improvement of digestion in ruminants
- ▶ The in vitro lab for modelling ruminant digestion
